TO

J O H N C O N O L L Y, M. D.

RESIDENT PHYSICIAN OF THE LANWELL ASYLUM,

In sincere admiration and grateful acknowledgement of his noble and successful efforts to ameliorate the condition of the poor Lunatic, by the substitution of a rational system of moral discipline for mechanical restraint, and parental care and kindness for violence and brute force, this little Work is, on public grounds, inscribed

BY

THE AUTHOR.

TO THE THIRD EDITION.

THE singular favour shown by the profession to this little work, evinced by the rapid sale of two large editions, makes it especially incumbent on the Editor to lose no opportunity of adding to its unpretending merits.

The present Edition has been carefully revised. Some errors found to exist in the former have been corrected: and several not unimportant additions have been made in various parts of it. It is therefore hoped that, in the condition which it now appears, it will be found still more deserving the patronage of those for whom it is intended.

TO THE SECOND EDITION.

THE very favourable reception which this little work has received from the profession, evinced by the exhaustion of a large impression within the year, has satisfactorily proved the justness of the author's opinion, that it was wanted, and would be useful. It is hoped that the present Edition, improved as it is in several respects, will be found still more completely to fulfil its object. In preparing it for the press, care has been taken to correct and amend some defects which were discovered on a close examination. Numerous additions have been made, and several changes have been adopted in the plan and arrangement, which will render the work still more useful. The principal of these are the following :—

1. The arrangement of the different CLASSES of Medicines in alphabetical order, as well as the individual articles in each class.
2. The separation, under a distinct head, of the external and chirurgical remedies from those for internal use.
3. The addition, in an Appendix, of many useful Tables.
4. The reduction of all the weights and measures (with one or two trifling exceptions) to the same denomination, or at least to the same class of signs, viz, grains, scruples, drachms, ounces, (gr., ℥, ℥, ℥); the measures of pint and gallon (O. cong.) being now rendered in ounces.

It has been thought unnecessary to prefix the *f* (*fluid*) to the ℥ and ℥ when representing *measured* quantities, as the omission can lead to no mistake, every one knowing that solids are weighed, and fluids measured.

N.B. In stating the *composition* of medicines, the exact *quantities* given in the *Pharmacopœia* have not always been retained, but the *proportions* only.

TO THE FIRST EDITION.

As this little work had its origin in a want daily experienced by the compiler in his practice, he believes that it will be useful to a numerous class of practitioners who possess a memory of the same general character as his own. He has always had great difficulty in calling to mind, at will, a number of heterogeneous particulars which had not been originally contemplated in a systematic order, although he might be well acquainted with them individually. This difficulty he has often painfully experienced when attempting to pass in review the various drugs and officinal formulæ suited to fulfil any special indication that presented itself in the treatment of a disease: and he has frequently witnessed, in the practice of others, a barrenness of prescription and a consequent confined range of

re sources, originating in the same cause, which could not fail to be injurious to the patient and the reputation of the physician. It is expected that the habit of viewing the articles of the *Materia Medica* in some such order as that adopted in the present compilation, will tend, in some degree at least to remedy these evils.

It is further believed that practitioners, from forgetfulness of the officinal preparations, are often led to prescribe extemporaneous formulæ while there exist better substitutes in the *Pharmacopœia*; and it is hoped that the marshalling together all the various compound forms of medicine under the title of the main ingredient, as in these tables, will at once facilitate and simplify the labours of the prescriber.

It is not pretended that the classification of medicines here adopted is even moderately accurate. One perfectly accurate is impossible. All that is intended or hoped for is an arrangement that will allow such a division of the substances as may be at once simple and practically useful. No attempt at scientific refinement in classification has been made. All the older and more common divisions and terms have been retained, as likely to be best understood and best remembered; and no effort has been made

to prevent the repetition of the same medicines in different sections of the classification.

Perhaps in a work of such slight pretensions as this, it is hardly necessary to advert to the sources whence its materials are derived. It may, however, be as well to state that wherever the Pharmacopœia and his own knowledge failed him, the author confidently turned to the inexhaustible store provided in Dr. Pereira's Elements of Materia Medica. In minor matters he has also benefited by the excellent compendium of Dr. Lane.

It will, perhaps, be remarked that the doses of medicines are, in many instances, below the usual standard—at least in their minor term. This is not unintentional; as the author is of opinion that the general habit of practitioners in this country is to prescribe medicines in doses not merely unnecessarily but injuriously large.

TO THE

SECOND AMERICAN EDITION.

THE present edition, from the third London, has been carefully compared with the 6th edition of the U. S. Dispensatory by Wood and Bache, and the formulæ altered to correspond with those given in it. In some instances the formulæ of the London Dispensatory have been retained, where new ones have not been ordered in our standard. The *uses* of medicines have been introduced to supply what appeared a defect in the London edition.

CALX. (Calx recens. Rarely used in medicine.)

1. LIQUOR CALCIS. (Lime water.)

Comp. A saturated solution. 11½ grs. in the pint of water at 60°.

Dose. f ℥ ij-vj, (with milk.)

2. CRETÆ PRÆPARATA. (Chalk purified by water.)

Dose. Gr. x-3 j.

3. PULVIS CRETÆ COMPOSITUS.

Comp. 12 chalk, 8 cinnamon, 6 tormentil, 6 acacia, 1 long pepper.

Dose. Gr. x-xx.

Use. In diarrhoea with acidity and without inflammatory symptoms.

4. PULVIS CRETÆ COMPOSITUS CUM OPIO.

Comp. 39 pulv. cret. comp. (No. 3,) 1 opium.

Dose. Gr. v-3 ss. ($\frac{1}{4}$ gr. opium in gr. x.)

Use. Same as above, but more efficacious.

5. MISTURA CRETÆ.

Comp. Chalk 3 ss, sugar 3 ij, gum arabic 3 ij,
cinnamon water and water $\ddot{\text{aa}}$ f 3 iv.

Dose. f 3 ss-ij.

6. TESTÆ PRÆPARATÆ. (Prepared oyster shells.)

Dose. Gr. x-3 j.

CONFECTIO AROMATICA. (See AROMATICS.)

MAGNESIA.

1. MAGNESIÆ CARBONAS. (Olim SUBCARBONAS.
Magnesia alba.) (PURGATIVES.)

2. MAGNESIA. (M. usta. Calcined M.)

Dose. Gr. v-xx (in aromatic water or milk.)
Better as antacid than No. 1. (PURGATIVES.)

Use. As an antacid in dyspepsia, sick headache,
gout. For children. For excess of uric acid.

POTASSA.

1. LIQUOR POTASSÆ.

Comp. Carb. potassæ 1b j, lime 1b ss, water 1 gall.

Use. In lepra, psoriasis and other cutaneous disorders. To correct acid state of urine.

Dose. M x-xxx. (In infus. aurant., beer, broth.)

[BRANDISII'S ALKALINE SOLUTION, is made by adding to a gallon of boiling water, pearlashes, 3 xij, quicklime and woodashes, of each 3 iv. It was given by the inventor in doses of 3 j to 3 ii j in beer twice a-day.]

2. POTASSÆ CARBONAS. (Potassæ subcarb.)

Dose. Gr. v-x-xxx.

3. POTASSÆ BICARBONAS. (Potassæ carb.)

Dose. Gr. v-x-xxx.

4. LIQUOR POTASSÆ CARBONATIS.

Comp. Carb. pot. $\frac{1}{2}$ j, water f $\frac{2}{3}$ xij.*Dose.* $\frac{1}{2}$ x-3j.

5. LIQUOR POTASSÆ EFFERVESCENS.

Comp. Bicarb. pot. 3j, water f $\frac{2}{3}$ xx, carb. acid, q. s.*Dose.* f $\frac{2}{3}$ iv, ad libitum.

SAPO. (Hard Soap. Soda and olive oil.)

Dose. Gr. v-xx (chiefly in combination.)

SODA.

Use. To correct too acid urino.

1. SODÆ CARBONAS. (Olim SODÆ SUBCARB.)

Dose. Gr. v-xxx.

2. SODÆ CARBONAS EXSICCATA. (Deprived of water of crystallization.)

Dose. Gr. iij-xv.

3. SODÆ SESQUICARBONAS. (Ol. SODÆ CARB.)

Dose. Gr. x-3j.

4. LIQUOR SODÆ EFFERVESCENS. (Soda water.)

Comp. Sesquicarb sod. 3j, water f $\frac{2}{3}$ xx, carbonic acid q. s.*Dose.* f $\frac{2}{3}$ iv, or ad libitum. (Better made by adding carb. sodæ (3j to f $\frac{2}{3}$ xx) to the common bottle soda water.)

Alteratives. Deobstruents.

ANTIMONIUM? See **EMETICS** and **DIAPHORETICS.**)

ARSENICUM. (See **TONICS.**)

BARII CHLORIDUM. (Muriate of baryta.)

1. **LIQUOR BARII CHLORIDI.**

Comp. Bar. chlor. $\frac{3}{4}$ j, water f $\frac{3}{4}$ iiij.

Dose. ℥ v.

Use. In scrofula, cancer, painful ulcers, cutaneous eruptions.

BROMINIUM. (Bromine.)

Dose and Form. Gr. 1-16 to gr. ss, dissolved in water. (Rarely used.)

1. **POTASSII BROMIDUM.**

Dose. Gr. j-x, in pill or solution.

Use. In scrofulous tumours, bronchocele.

CALCII CHLORIDUM. (Muriate of Lime.)

(See **TONICS.**)

1. **LIQUOR CALCII CHLORIDI.**

Comp. Marble in fragments $\frac{3}{4}$ ix, acid hydrochl. Oj, aq. distill. q. s.

Dose. f $\frac{3}{4}$ ss-f $\frac{3}{4}$ j.

Use. Tabes mesenterica, scrofulous affections.

GUAIACUM. (See **DIAPHORETICS.**)

Use. Secondary syphilis, cutaneous eruptions.

HYDRARGYRUM. (Mercury.) (See **PURGATIVES.**)

1. **HYDRARGYRUM CUM CRETÀ.**

Comp. 3 mercury, 5 chalk

Dose. Gr. ij-v.

Use. Principally for children: in deficient biliary secretion.

2. PILULÆ HYDRARGYRI.

Comp. Mercury 3j, confect. roses 3 iss, liquorice 3 ss.

Dose. Gr. j-v.

Use. A mild mercurial.

3. HYDRARGYRI OXYDUM.

Dose. Gr. ss-ij. (Rarely used.)

4. HYDRARGYRI CHLORIDUM. (Submuriæ. Calomel.)

Dose. Gr. $\frac{1}{4}$ -j.

5. PILULÆ HYDRARGYRI CHLORIDI COMPOSITÆ. (Plummer's Pill.)

Comp. 1 calomel, 1 sulphuret of antimony, 1 treacle, 2 guaiacum, (1 gr. calomel in v.)

Dose. Gr. iij-v-x.

Use. Chronic rheumatism. Scaly eruptive diseases.

6. HYDRARGYRI BICHLORIDUM. (Oxymuriæ. Corrosive sublimate.)

Dose. Gr. $\frac{1}{16}$ - $\frac{1}{8}$.

Use. Secondary syphilis, cutaneous diseases.

7. LIQUOR HYDRARGYRI BICHLORIDI.

Comp. Bichlor. of merc., hydrochlorate of ammonia, aa gr. x; water f 3 xx.

Dose. 3ss-ij in mild liquids, e. g. linseed tea. (Gr. ss. of hyd. bi. in 3j, gr. 1-16 in 3j.)

8. HYDRARGYRI IODIDUM.

Comp. Mercury 3j, iodine 3 v, alcohol q. s.

Dose. Gr. j-iij.

Use. In scrofula and scrofulous syphilis.

9. HYDRARGYRI BINIODIDUM. (More energetic than No. 8.)

Comp. Cor. sub. 3*i*, iod. pot. 3*x*, aq. dist. Oij.

Dose. Gr. 1-16 - $\frac{1}{4}$.

Use. Same as above.

10. PILULÆ HYDRARGYRI IODIDI.

Comp. 1 iodide of mercury, 1 ginger, 3 confec-
tion of rose. (1 gr. of iod. of merc. in gr. v.)

Dose. Gr. v-x.

11. HYDRARGYRI BISULPHURETUM. (Cinnabar.
Red sulphuret.)

Dose. (Rarely used internally.) For fumigation,
3ss.

12. HYDRARGYRI SULPHURETUM CUM SULPHURE.
(Black sulph., \mathcal{A} ETHIOPS mineral.)

Dose. Gr. v-xx.

 (See PART II.)
21. UNGUENTUM HYDRARGYRI IODIDI. (See
 PART II.)
22. UNGUENTUM HYDRARGYRI BINIODIDI. (See
 PART II.)

IODINIUM. (Iodine.)

Dose. Gr. ss-ij, in pills—for immediate use.
 (Rarely used in substance.)

1. TINCTURA IODINII COMPOSITA.

Comp. Iod. $\frac{3}{2}$ ss, iod. of pot. $\frac{3}{2}$ j, alc. Oj.

Dose. $\frac{3}{2}$ v- $\frac{3}{2}$ j, (dilute when used.)

Use. Mostly externally. Erysipelas, chilblains.

2. IODIDUM HYDRARGYRI. (See HYDRARG.)

**3. BINIODIDUM HYDRARGYRI. (See HYDRARGY-
 RUM.)**

4. POTASSII IODIDUM. (Hydriodas Potassæ.)

Dose. Gr. j-v-x- $\frac{3}{2}$ j.

Use. Scrofula, syphilitic rheumatism, strumous ophthalmia, secondary syphilis.

5. LIQUOR POTASSII IODIDI COMPOSITUS.

Comp. Iod. of potassium $\frac{3}{2}$ iss, iodine $\frac{3}{2}$ vj, water Oj.

Dose. $\frac{3}{2}$ vj, containing iodine gr. $\frac{1}{4}$.

6. PLUMBI IODIDUM.

Dose. Gr. $\frac{1}{4}$ -ij.

Use. For discussion of scrofulous tumours.

7. UNGUENTUM PLUMBI IODIDI. (See PART II.)

8. UNGUENTUM IODINII COMPOSITUM. (See PART II.)

9. UNGUENTUM HYDRARGYRI IODIDI. (See PART II.)

10. UNGUENTUM HYDRARGYRI BINIODIDI. (See PART II.)

11. FERRI IODIDUM. (Iodide of iron.)

Dose. Gr. ij-x, in distilled water, or thick colourless syrup.

SARZA. (Smilax officinalis. Sarsaparilla. The root.)

Dose. 3ss-ij, in powder.

1. DECOCTUM SARZÆ.

Comp. Sarza 3 ijss, water 3 xl, boil to 3 xx.

Dose. f 3 iv-viij. (Usually with extract or syrup.)

2. DECOCTUM SARZÆ COMPOSITUM. (Lisbon diet drink.)

Comp. Sarsap. 3 vj, sassaf. guaiacum and liquorice each 3 j, mezereon 3 iij, aq. Oiv.

Dose. f 3 iv-f 3 vj, ter in die.

Use. In secondary syphilis.

3. SYRUPUS SARZÆ.

Comp. Decoct. sarzæ and sugar.

Dose. f 3 iij-3 j. (Of feeble power.)

4. EXTRACTUM SARZÆ. The watery extract.

Dose. 3j-3ij. (Rubbed down with water, flavoured with tinct. aurant. or volatile oil:—also made into pills.)

5. SYR. SARSAP. COMP. U. S.

Comp. Sarsap. 1bij, guaiac. 3 iij, rose leaves, senna and liquorice root, each 3 ij, ol. sassaf. and anisi, each 3 v, ol. gaulth. 3 iij, dil. alcohol Ox, sugar 3vij.

Dose. f 3 ss.

Use. In syphilis, cutaneous eruptions, scrofula.

Anthelmintics.

ASPIDIUM. (Felix mas. The male Fern. The root.)

Dose. 3 j-ij, in powder.

[*Note.*—Nouffleur's plan:—3 ij in water 3 iv; after six hours, a bolus of calomel (gr. x), scammony and Gamboge.]

Use. In cases of tænia.

GRANATUM. (Punica granatum. Pomegranate. Bark of the Root.)

Dose. Decoction (3 j of fresh root in water f 3 xx, boil to f 3 x) f 3 ij every half hour.

Use. Same as preceding.

MUCUNA. (Dolichus pruriens. Cowhage. Hairs of the pod.)

Dose. Gr. v-x in syrup, treacle, or honey.

Use. In cases of lumbrici.

OLEUM TEREBINTHINÆ. (See DIURETICS.)

Dose and Form. f 3 ss-ij, on aromatic water, with hot tincture, (e. g. Tinct. caps. or cinn. or card. c.) ; or as emulsion or linctus.

Use. In cases of tænia, lumbrici.

Dose. Gr. x-xx.

Form. Pill, solution in water, &c., syrup of mulberries, (for children.)

10. QUINÆ DISULPHAS. (Sulphate of quinine.)

Comp. From the C. cordifolia.

Dose. Gr. ss-x.

Form. Pill, with conserve of roses, powder with sugar. Solution, in acidulated liquids, water, alcohol or syrup.

[The best vehicle is distilled water, slightly acidulated. It is little soluble in pure water; more so in spirit. Soluble in 780 parts of cold water, or 80 parts of spirit of sp. gr. 0.85. (Pereira.) Very soluble in sulph. acid. A drachm of acid. sulph. dil. will dissolve gr. xx. A convenient strong solution is made by dissolving gr. j. in water $\frac{3}{2}$ j, by the addition of acid. sulph. dil. $\frac{3}{2}$ ij. When infusion of roses is

used as a vehicle, dilute nitric acid should be used in place of sulphuric, and in the proportion of *half as much more* as of the sulphuric. The nitric acid keeps the tannate of quinine in solution, and keeps the mixture clear. (Mr. Squire, in *Pharm. Jour.*.)]

Use. Preferable to cinchona from convenience of administration. Possesses more anti-intermittent and less tonic property than cinchona.

GENTIANA. (G. Lutea. The root.)

Dose. Powder gr. x-3 ss. (Not much used.)

Use. In dyspepsia, gout, worms, intermittent.

[MOXAS.]

Substances for producing counter-irritation by being burnt on the part. They are composed of various materials, and may be composed of any that will burn down slowly, such as cotton, the pith of plants, agaric, German tinder, &c. Percy used an *artillery match*. Larrey's moxa was a truncated cone of cotton stitched in linen, about four lines wide and six lines high. Dr. Sadler's, of St. Petersburg, are composed of the pith of the sunflower, cotton, and linen, steeped in a solution of nitre. Gräfe employed wafers dipped in three parts of oil of turpentine and one part of ether.]

Inhalation.

Medicines are applied to the mucous membrane of the larynx, trachea, and bronchi, in several ways.

1. Diffused in the air of the chamber, and thus inhaled in ordinary respiration. The vapour of water (steam), the fumes of tar, resin, myrrh, &c., are thus applied.

2. Mixed with water in a close glass vessel having two tubes inserted into it, the one admitting the air and passing it through the mixture, the other inserted into the patient's mouth, through which the air of the vessel is drawn into the lungs. Chlorine gas, tincture of iodine, of eonium, &c., are thus inhaled.

3. By means of the apparatus called "Mudge's Inhaler," or a greatly improved modification of this by Dr. Harwood, having a mouthpiece, which renders the process of inhalation much easier. Warm, watery vapours, in which various medicines may be diffused or developed, are thus applied to the air-passages.

M E D I C A L B O O K S ,
PUBLISHED BY
SAMUEL S. & WILLIAM WOOD,
261 Pearl-street,
NEW YORK.

THE FIRST LINES OF THE THEORY AND PRACTICE OF SURGERY ; including the principal operations. By SAMUEL COOPER, Professor of Surgery in University College Hospital, London, &c. With notes and additions by WILLARD PARKER, M.D., Professor of Surgery in the College of Physicians and Surgeons, in the University of the State of New York, &c. 4th American, from the 7th London, edition.

"The work of Samuel Cooper, having passed through *seven* English, and *four* American, editions, requires no commendation to ensure the present edition an early sale. It abounds in accurate principles and practical precepts, the result of extensive experience and careful observation ;" and the additions by Prof. Parker, "are highly judicious, and in no small degree enhance the value of the original work."—*Western Lancet.*

THE INFLUENCE OF TROPICAL CLIMATES ON EUROPEAN CONSTITUTIONS. By JAMES JOHNSON, M.D., and JAMES RANALD MARTIN, Esq. From the sixth London edition, with Notes by an American Physician.

"This, the Book on Tropical Climates, scarcely needs commendation at our hands, and there is little in its many pages except the promulgation of sound truths, and as sound deductions. Almost every American medical man has read and been benefited by this early production of the lamented author; an author who has done more through his numerous works, with the 'Medical and Chirurgical Journal,' to mould correctly the medical opinion in these United States, than even any, or many of its eminent native writers.

"We would advise all who do not possess this work, and who value information and amusement, to obtain it."—*New York Journal of Medicine.*

"Of the comparatively few medical books, amongst the many with which the press teems, destined to survive the changes incident to progressive advancement in science, the celebrated work on Tropical Climates, by Dr. Johnson, the late distinguished editor of the Medico-Chirurgical Review, is a prominent example."—*Buffalo Medical Journal.*

THE ANATOMICAL REMEMBRANCER; or, Completo Pocket Anatomist: containing a concise description of the Bones, Ligaments, Muscles, and Viscera, the distribution of the Nerves, Blood-Vessels, and Absorbents, the ar- rangement of the several Fasciæ, the Organs of Generation in the Male and Female, and the Organs of the Senses.

"It contains but two hundred and fifty pages, and is really an anatomical *multum in parvo.*"—*London Med. & Surg. Journal.*

"Every medical man, as well as pupil, would do well to have it on his table."—*Buffalo Medical Journal.*

"It will be found of great assistance to those who frequent the dissecting room, or are desirous of renewing at a glance, the knowledge they have acquired at some former period."—*Southern Journal of Medicine and Pharmacy.*

A MANUAL OF CHEMISTRY. By RICHARD D. HOBLYN, A.M., OXON.

"It is an excellent work of its kind, and the author enters as fully into the subject as he can, and indeed as fully as is

necessary in a manual 'prepared for the purpose of affording public or private instructions in the principles of chemistry.' He has stated 'the most important facts and theories of the science in as condensed a form as the subject admits.'—"New York Journal of Medicine.

"In descriptions somewhat parenthetical, yet clear, the author contrives to communicate a great deal of information to the learner in a small space."—*Bulletin of Med. Science.*

"It is rarely that we meet with a manual so well adapted for the object of its publication.

"The most important facts and theories of the science are stated in as condensed a form as the subject admits.

"The work is tersely written, and with so much conciseness, that a great amount of matter is comprised in comparatively a few pages. We know, indeed, of no work on the same subject, that contains so clear and comprehensive an account of the principles of chemistry, within any thing like so brief a space."—*Medical Examiner.*

LECTURES ON NATURAL AND DIFFICULT PARTURITION. By EDWARD WILLIAM MURPHY, A.M., M.D., Professor of Midwifery, University College, London.

"They are characterized by a profound knowledge of the subjects on which they treat, and attest the careful, thoughtful, modest, and discriminating mind of the author."—*Med. Chir. Review.*

"The student will find it replete with accurate and lucid instruction."—*London Medical Gazette.*

THE MEDICAL REMEMBRANCER ; or, Book of Emergencies ; in which are concisely pointed out the immediate remedies to be adopted in the first moments of danger from Poisoning, Drowning, Apoplexy, Burns and other accidents, with the tests for the principal Poisons, and other useful information. By EDWARD B. L. SHAW, M.R.C.S., and L.A.S., &c. Revised and Improved by an American Physician.

THE YOUNG STETHOSCOPIST ; or, The Student's Aid to Auscultation. By HENRY J. BOWDITCH, M.D.

"Plain and simple in its arrangement, accurate in details, and sufficiently extensive for elementary purposes, it should become the companion of every student of auscultation."—*Western Lancet.*

A TREATISE ON DISEASES OF THE CHEST, AND ON MEDiate AUSCULTATION. By R. T. H. LAENNEC, M.D. Translated from the 3d French edition, with copious notes, a Sketch of the Author's Life, and an extensive bibliography of the different diseases. By JOHN FORBES, M.D., F.R.S. To which are added the Notes of Professor Andral, contained in the 4th and latest French edition, translated and accompanied with observations on Cerebral Auscultation. By JOHN D. FISHER, M.D. With Plates.

"We cannot occupy more of our space at present with further extracts from this most valuable work; but we cannot conclude without recommending it to our readers in the strongest terms, and for the third time, but, we hope not the last, as the most comprehensive and valuable work which has ever been published on the pathology and diagnosis of diseases of the chest."—*Med. Chir. Review.*
